美术用品纸

Art supplies paper

东阳市起源纸业有限公司涉足纸业20余年，坐落于浙江省东阳市画水镇威龙塑胶产业园1栋。是一家生产加工为一体的纸制品企业。拥有多条纸机生产线。实现自主生产彩胶，彩卡，压纹原纸。珠光底纸，硫酸纸，牛皮纸，喜庆用品纸。拥有涂布荧光，珠光纸，金银卡，金葱纸，触感纸等多条生产线以及印刷包装，分切等多种设备。支持客户不同需求定制。

产品广泛应用于文化用品，益智手工DIY，手工艺品，喜庆包装，服装吊牌，各种卡片及产品包装等领域。多年来公司致力于创新开发生产，本着客户第一，诚信经营的企业理念，以优质的产品和服务获得国内外客户的一致认可。产品广泛应用于文化用品，益智手工DIY，手工艺品，喜庆包装，服装吊牌，各种卡片及产品包装等领域。多年来公司致力于创新开发生产，本着客户第一，诚信经营的企业理念，以优质的产品和服务获得国内外客户的一致认可。

X C Paper Co., Ltd. has been involved in the paper industry for more than 20 years, and the first batch was located in Building 1, Weilong Zhejiang Precision Industrial Park, Huashui Town, Dongyang City. It is a paper products company that produces and processes all paper products. It has multiple paper machine production lines. Achieve independent production of color glue, color card, and embossed base paper. Pearlescent paper, sulfuric acid paper, kraft paper, paper for festive supplies. It has multiple production lines for RFID, pearlescent paper, gold and silver cards, glitter paper, tactile paper, etc. as well as printing and packaging to support customization for customers' different needs. Products are widely evaluated in cultural supplies, educational handmade DIY, handicrafts, festive packaging, clothing tags, various accessories and product packaging and other fields. Over the years, the company has been committed to innovative development and production. Based on the corporate philosophy of customer first and honest management, it has won unanimous recognition from customers with high-quality products and services.

纸制品原材料系列

Paper product raw materials

● 彩胶纸

● colored paper

纸面光滑，超级压光的胶版纸，它的平滑度，紧度比普通压光的纸好，印上文字，图案后可衡携与黄板纸裱糊成纸盒。胶版纸主要供平版（胶印）印刷机或其他印刷机印制较高级彩色印刷品，如彩色画报、画册、宣传画、彩印商标及一些高级书籍，以及书籍封面，插图等。胶版纸伸缩性小，对油墨的吸收性均匀，平滑度好，质地紧密不慧腊透明，白度好。抗水性能强。也可用于儿童做手工折纸。

The paper is smooth and super-calendered offset paper. Its smoothness and tightness are better than ordinary calendered paper. After printing text and patterns, it can be mounted with yellow board paper to form a carton. Offset paper is mainly used for lithographic (offset) printing machines or other printing machines to print higher-end color prints, such as color pictorials, albums, posters, color printing trademarks and some high-end books, as well as book covers, illustrations, etc. Offset paper has small elasticity, uniform absorption of ink, good smoothness, tight texture, transparent wax, and good whiteness. Strong water resistance. It can also be used for children to make handmade origami.

● 彩卡纸

● Color card

彩色卡纸指一种厚度介于纸张与纸板之间、质地好、挺括光滑、定量在180~300g/m²之间的纸制品，它由白卡纸的浆料进行染色而得。

白卡纸通常采用100%的漂白木浆为原料，面层、底层采用硫酸盐化学针叶木浆，芯层采用阔叶木化学机械浆，浆料经过打浆后加入碳酸钙、硫酸钡等填料，用AKD进行中性重度施胶，在叠网造纸机上进行抄造，并经压光、涂布处理而成，根据需要，经过压纹处理则可生产带有特殊压印花纹的卡纸。除白色外，通过对浆料进行染色，还可生产各种色泽的卡纸

Colored cardboard refers to a paper product with a thickness between paper and cardboard, good texture, crisp and smooth, and a basis weight between 180 and 300g/m². It is dyed from the slurry of white cardboard.

White cardboard usually uses 100% bleached wood pulp as raw material. The surface layer and bottom layer use sulfate chemical softwood pulp, and the core layer uses hardwood chemical mechanical pulp. After beating, fillers such as calcium carbonate and barium sulfate are added to the slurry. AKD is neutrally and heavily sized, made on a stacked paper machine, and then calendered and coated. If necessary, it can be embossed to produce cardboard with special embossed patterns. In addition to white, cardboard of various colors can also be produced by dyeing the slurry.

● 涂布纸 ● coated paper

涂布纸，俗名铜版纸，种类较多，可用于各种各样的彩色印刷品的印刷。涂布纸的种类有以下几种：

1. 单面铜版纸：为一面涂布压光，一面上胶处理。纸张两面性质不同，适用于两面不同的印刷。
2. 双面铜版纸：为两面涂布压光处理，底面有光泽，具有良好的尺寸稳定性，适用于一般的彩色印刷。

Coated paper, commonly known as coated paper, has many types and can be used for printing a variety of color prints. The types of coated paper are as follows:

1. Single-sided coated paper: One side is coated and calendered, and the other side is glued. The two sides of the paper have different properties and are suitable for printing on both sides.
2. Double-sided coated paper: It is coated and calendered on both sides, the bottom side is shiny, has good dimensional stability, and is suitable for general color printing.

● 皮纹纸 ● Dermatoglyph Paper

皮纹纸有纯木浆的和杂浆的，纯木浆造出来的颜色比较正，纸质比较挺括，而且比较细腻，纹理清晰；杂浆造出来的纸颜色暗淡，色彩不均匀，纸质松软，看起来粗糙。皮纹纸的纹理比较深，表面凹凸不平，印刷时有时字迹显的虚，这就要印刷时机器压力要加大，印出来的字迹才清晰。皮纹纸用途比较广泛，厚克重的适合做样本封面、标书，薄克重的皮纹适合做礼品包装和装帧封面。皮纹纸的价格比较便宜，适合大小印刷厂。

Dermatoglyph paper has pure wood pulp and mixed pulp. The color of pure wood pulp is relatively positive, the paper is stiffer, more delicate, and the texture is clear; the paper made of mixed pulp is dull in color, uneven in color, and paper texture. Soft and rough looking. The texture of leather-grained paper is relatively deep and the surface is uneven. Sometimes the handwriting appears blurry during printing. This requires increasing the pressure on the machine during printing to make the printed handwriting clear. Leather paper has a wide range of uses. The thicker and heavier ones are suitable for sample covers and tender documents, while the thinner and heavier ones are suitable for gift packaging and binding covers. Leather paper is relatively cheap and suitable for large and small printing plants.

SIZE

10PCS

每张纸板尺寸为 8.3 x 11.8 英寸，由纸板制成，可以轻松切割、折叠并用丝带、闪光和油漆进行装饰。将多张纸张叠在一起，为框架项目、剪贴簿或贺卡创建坚固、厚的背衬。纸板也非常适合制作礼盒、3D 创作、面具和课堂小组项目。

Each sheet measures 8.3 x 11.8 inches and is made from cardboard that can be easily cut, folded, and decorated with ribbon, glitter, and paint. Stack multiple sheets of paper together to create a sturdy, thick backing for framing projects, scrapbooking, or greeting cards. Cardboard is also great for making gift boxes, 3D creations, masks and classroom group projects.

● 牛皮纸 ● Kraft paper

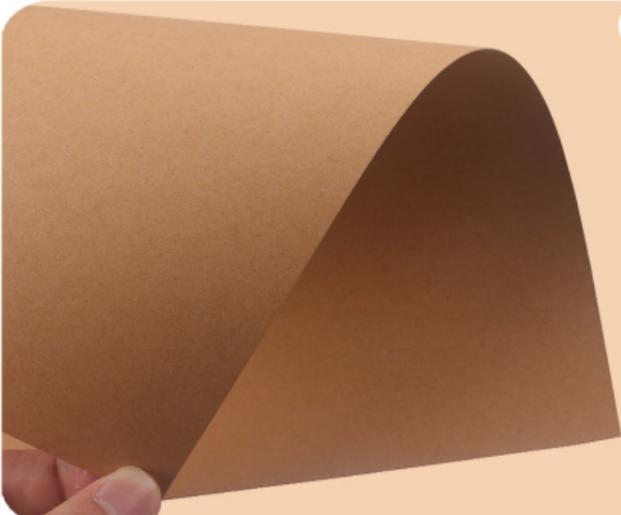

牛皮纸广泛应用于化工、机械等行业，尤其是食品包装行业。

1、牛皮纸广泛应用于各类包装物品，如纸袋、手袋牛皮纸、彩盒、礼品盒牛皮纸、印刷牛皮纸、笔记本牛皮纸、练习本牛皮纸、信封牛皮纸、食品包装，以及各种高档商品包装，如酒盒、运动服的礼品盒；信封，如文教卫生、企事业单位档案保管等。，如常见的邮政印章；也可用于加工购物袋，如商场、品牌店常见的购物袋，或箱板挂纸。牛皮纸的抗张强度使其非常适合包装，从而避免了包装袋破裂的缺点。

2、牛皮纸也可以用作缓冲材料。一些精密零件，如汽车零件，需要缓冲。牛皮纸是一种很好的缓冲材料。切成细条，填在里面起到缓冲作用，环保，成本低。

3、牛皮纸特别适合制作多层牛皮纸袋，用来装水泥、腻子粉、重晶石粉、钛白粉、干粉砂浆等一切粉状产品。也可用于制作绝缘纸、沥青纸、电缆保护纸、胶粘纸等。具有防潮、防漏、堆放方便、不易滑落、运输安全等特点，是国内外首选的包装材料之一！用牛皮纸包装的好处是由牛皮纸的性能决定的，因为牛皮纸可以多次回收再利用，环保，而且价格不高，印刷成本低，节约成本。

4、和损坏。对于冷冻食品的包装，使用高强度材料作为包装也是考虑的关键。这种材料必须能承受低温冷冻和高温融化时的热胀冷缩，防止填充食物时变形、扭曲、起皱和过度吸湿。从这些方面来说，原色牛皮纸甚至比SBS纸更合适。

Kraft paper is widely used in chemical, machinery and other industries, especially in the food packaging industry.

1. Kraft paper is widely used in various packaging items, such as paper bags, handbag kraft paper, color boxes, gift box kraft paper, printing kraft paper, notebook kraft paper, exercise book kraft paper, envelope kraft paper, food packaging, and various high-end commodity packaging, such as wine boxes , gift boxes for sportswear; envelopes, such as culture, education and health, archives storage of enterprises and institutions, etc. , such as common postal seals; it can also be used to process shopping bags, such as shopping bags commonly seen in shopping malls and brand stores, or cardboard hanging paper. The tensile strength of kraft paper makes it ideal for packaging, thus avoiding the disadvantages of bag breakage.

2. Kraft paper can also be used as buffer material. Some precision parts, such as automotive parts, require cushioning. Kraft paper is a great cushioning material. Cut into thin strips and filled inside to act as a buffer, which is environmentally friendly and low cost.

3. Kraft paper is particularly suitable for making multi-layer kraft paper bags, which can be used to contain all powdery products such as cement, putty powder, barite powder, titanium dioxide, dry powder mortar, etc. It can also be used to make insulation paper, asphalt paper, cable protection paper, adhesive paper, etc. It is moisture-proof, leak-proof, easy to stack, not easy to slip, and safe to transport. It is one of the preferred packaging materials at home and abroad! The benefits of packaging with kraft paper are determined by the performance of kraft paper, because kraft paper can be recycled and reused many times, is environmentally friendly, and is not expensive, with low printing costs and cost savings.

4. And damage. For the packaging of frozen food, the use of high-strength materials as packaging is also a key consideration. This material must be able to withstand thermal expansion and contraction during low-temperature freezing and high-temperature thawing, and prevent deformation, distortion, wrinkles and excessive moisture absorption when filling food. In these aspects, original color kraft paper is even more suitable than SBS paper.

● 硫酸纸

● litmus paper

硫酸纸是印刷转印纸，也被称之为描图纸。

1、这种纸主要的用处就是用来描图、打印。这种纸的特点是纯净度非常的高，透明度也比较高，而且不容易出现变形的情况，再者还是比较耐晒，耐高温以及抗老化的。

2、像是在生活中做一些手工描绘或者是工程静电复印以及激光复印，再有就是美术印刷或者做一些重要的档案记录等等都往宏锋知往使用这种纸。

3、这种硫酸纸其质地是比较坚硬的，而且还具有一定的防潮防水，像是很多礼品的包装盒或者是相册的内页，再蔽消有就是转印橡皮章之类的都会使用到。

Sulfuric acid paper is printing transfer paper, also known as tracing paper.

1. The main use of this kind of paper is for tracing and printing. The characteristics of this kind of paper are that it has very high purity, high transparency, and is not prone to deformation. In addition, it is relatively light-resistant, high-temperature resistant and anti-aging.

2. For example, if you are doing some hand-painting or engineering electrostatic copying and laser copying in daily life, or doing art printing or making some important archival records, Hongfengzhi often uses this kind of paper.

3. This kind of sulfuric acid paper has a relatively hard texture and is also moisture-proof and waterproof to a certain extent. It is used in many gift packaging boxes or the inside pages of photo albums. It is also used for printing rubber stamps and the like. .

给您选择我们的理由:

- 1、我们从造纸开始到厚道生产加工自主完成，源头厂家，品质稳定，价格优势
- 2、库存量足，交货周期短，服务高效，帮客户节省财力，精力。
- 3、支持克重，颜色，尺寸，包装方式定制，机动性强。
- 4、我们希望有长足的发展，实现对社会的企业价值，所以我们懂得珍惜每次被信任的机会。

Give you reasons to choose us:

1. We start from papermaking to honest production and processing independently. We are the source manufacturer, with stable quality and price advantage.
2. Sufficient inventory, short delivery cycle, and efficient service help customers save financial resources and energy.
3. Supports customization of weight, color, size, and packaging method, with strong maneuverability.
4. We hope to have long-term development and realize corporate value to society, so we know how to cherish every opportunity to be trusted.
